# TWIN LED OBSTRUCTION LIGHT

---

Twin: 2 x OL-350-R (red)

**The OL-350RX2 light is a LED double low intensity obstruction light** that meets the ICAO annex 14 Vol I chapter 6 specifications (Type A and Type B) and can be used as both ON or stand-by configuration.

As an option it comes with a **photocell for night operations**. The base piece of each light is made of high strength threaded aluminum, painted on aviation yellow and equipped with two standard E-27 lamp holders.

The lens is made of polycarbonate with special UV/abrasion-resistant capabilities. **The polycarbonate has 250 times the impact strength of glass and 30 times the impact of acrylic.**

Maintenance, such as cleaning and scratch removal, is minimal.

The lens is available in red, in accordance to Appendix 1 of ICAO ANNEX 14 VOL I. Other colors available on request
